INFORMATION = CONTROL

## TD-1000 Tank Monitor.

The TD-1000 tank monitor provides an intelligent solution for the monitoring of any tank. The system consists of the TD-1000 controller (as seen above), and the SmartSwitch pressure sender. (see <https://smartswitch.co.nz/manuals.html>)

### Features:

- Programmed names (selectable)
- Programmable alarm point (tank full or empty)
- Two display modes
- Two- and five- point tank level calibration
- Programmable pump auto stop point (turn on manually)

### Sensor available in either bottom or top mount:

- Sen-100 for tanks up to 1meter deep
- Sen-250 for tanks up to 2.5m deep
- Sen-400 for tanks up to 4m deep
- Others available on request

Top Mount options available:

600mm and 1200mm (cut to suit tank depth) other lengths available on request

Operate voltage = 9 - 30vdc

Quiescent Current = 30mA @12vdc

Alarm/Buzzer output = 300mA @ 12vdc

Pump output = 4 Amps @ 12vdc

Size = 65mm x 65mm x 80mm Deep

Sensor = 1/4 NPT
